

## Nonventilated Roof Curbs

Prefabricated, leakproof curbs provide compatibility between ventilator, curb, and roof opening on commercial and industrial buildings. Most include 1" insulation and integral damper tray. Adjustable curbs are shipped unassembled. For recommended dampers, see page 4104.

**Canted**—For flat, noninsulated roof decks with thick or rigid roofing material. 18-ga. galvanized steel body construction with fully welded corners. Fixed curbs include 1½" wood nailer.

- For noninsulated metal, concrete, or wood roof decks
- For built-up asphalt or coal tar roofing materials

**Straight-Sided**—For flat roof decks with up to 6" of insulation. Roll-formed with 18-ga. galvanized steel and 1 welded side for added strength. Fixed curbs include 1½" lap-joint wood nailer.

## Rooftop Accessories

**Rooftop Equipment Mounting Rail**—Provides uniform mounting pedestals for various roof-mounted equipment.

**Flat Roof Flashing**—Flexible rubber cap fastens to seamless aluminum base for secure, watertight seal. Stainless steel clamps included.

**Shingle Roof Flashing**—Galvanized base with elastomeric center collar for slopes up to 40°.

**Corrugated-Metal Roof and Wall Flashing**—1-pc. weather-resistant EPDM flexible rubber flashing with integral aluminum base.

**Mounting Rail**

**Flat Roof Flashing**

**Single-Ply EPDM Rubber Roof Repair Kit**—Includes carry box, seam tape to join pieces of rubber, adhesive-backed cover tape for repairing punctures and tears in membranes, and adhesive-backed flashing tape to repair corner molding and flashing. Also includes primer wash and applicator, scissors, and seam roller.
