

Ventilation Solutions

Variable Speed Exhaust Ventilators

Dayton variable speed roof mounted ventilators feature a motor mounted potentiometer which allows up to 80% useable turndown and eliminates the need to wire a speed control. These units are available in both Upblast (Item Nos. *5DVR2-5DVR4*) and Downblast (Item Nos. *5DVT2-5DVT4*) configurations. For complete specifications, see the Grainger catalog or visit www.solutionsforair.com.

Industrial 2-Speed Air Circulators

VENCO® 2-speed air circulators are designed to move high volumes of directed airflow at low velocity, keeping individuals comfortable and productive. Units are available in Direct Drive (Item Nos. *4VAC9, 4VAD1-4VAD6*) and Belt Drive (Item Nos. *4VAD7-4VAD9*) configurations. Performance capacities range from 3,500 - 21,000 CFM and 4 different mounting options are available.

Prop Dia.	Drive Type		Mounting Accessory			
	Direct	Belt	Ceiling Mount	Suspension Mount	Mobile Kit	Tilttable Carriage
18"	●		●	●

48"	●	●		●	●	●

Hot Water Booster Coils

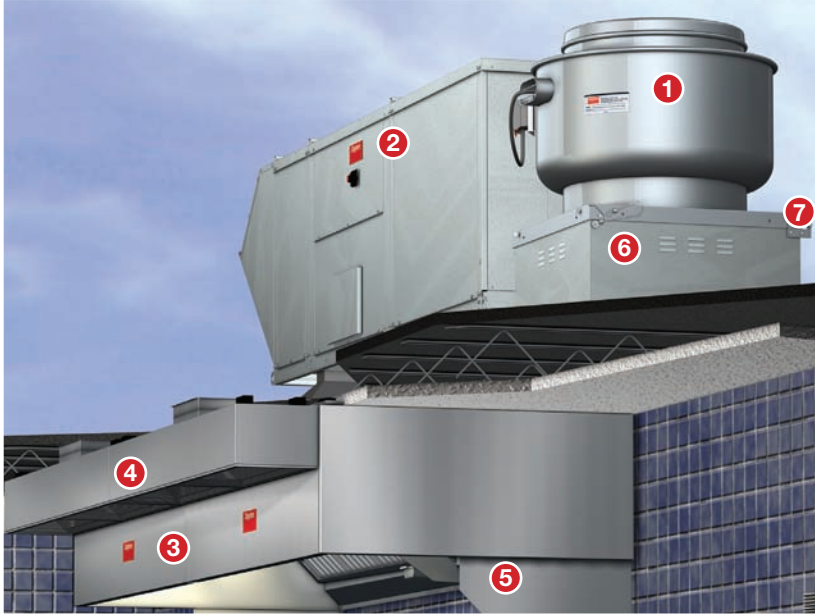

Booster coils are designed for air heating applications using hot water and are ideal for both replacement and new construction applications. Coils can be mounted in air-handling units or inside ductwork. Flanged (Item Nos. *5GEM4-5GEM9, 5GEN0-5GEN5*) and Slip & Drive (Item Nos. *5GEN6-5GEN9, 5GEP0-5GEP7*) casing styles are available. For additional information, visit the Grainger catalog or go to www.solutionsforair.com.

Commercial Kitchen Systems

Every commercial kitchen requires proper ventilation and now Grainger has the product offering to meet your system needs.
