

Axial Belt-Drive Downblast Exhaust Ventilator

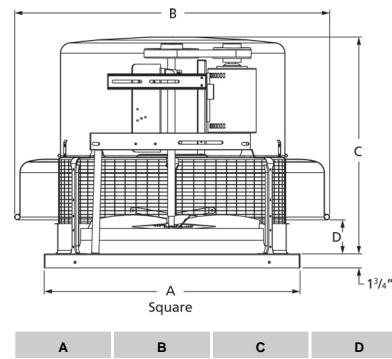

Designed for situations that require steady exhaust of clean air under low-to-moderate static pressures. Spun aluminum construction including a fully rolled bead on the windband, ensures stability and provides rigidity for lifting and transporting.

- Maximum inlet air temperature: 120° F
- NEMA 1 junction box located in motor enclosure
- Optional NEMA 1 and 4 disconnects available
- Regreaseable pillow block bearings
- UL/CUL 705 Listed for Power Ventilators
- Air handling quality bearings meet minimum of L10-100,000 hours

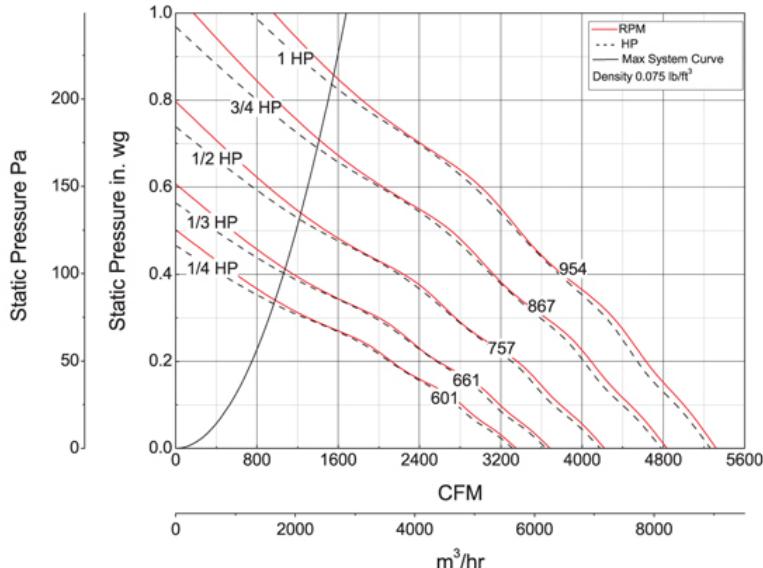

Dayton Electric Mfg. Co. certifies that the ventilators shown herein are licensed to bear the AMCA seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

The image contains three distinct labels. At the top is the text 'UL/cUL 705'. Below it is the 'UL Listed' logo, which consists of a circular 'UL' inside a circle with the word 'LISTED' to the right. At the bottom is the text 'E53236'.

Performance Characteristics

Construction Features

Impeller Diameter (Typ.)	24 in
Impeller Type	Propeller
Impeller Material	Steel
Number of Blades	5
Max Inlet Temp	120 °F
Bearing Type	Regreaseable Pillow Block
Drive Package Description	Drives By Others
Warranty Length	1 Year
